

HYPERVERVENT

Proven to reduce
Moisture Damage

Constructed from lightweight flexible plastic yet rigid enough to hold its shape indefinitely. Prevents dampness and the accompanying annoyances including mildew and odour by supporting surface of mattress to permit warm air to circulate under the mattress or cushions, thereby minimizing an essential condition for condensation, circulating air promotes evaporation of moisture.

A better way to
Manage Moisture

- Elevates bedding 3/4" and allows nearly unobstructed air flow
- Easily cut with scissors
- 3" fabric flap for simple seaming
- Excellent durability
- Lightweight
- Virtually maintenance free
- Cleans with soap and water

Part No. 007743 per lineal metre
