

Camec RV MEDIA BLUETOOTH SPEAKER APP DOWNLOAD

APP UPDATE

Android Update

Instructions on how to access CAMEC new RV Media Android App for the RGB Bluetooth Weatherproof LED speaker / Awning Light.

Open the Play Store app

1. On your device, go to the Apps section
2. Tap Google Play Store 
3. The app will open and type “RV Media” in the search bar (See image)

4. Click the “Install” button to download the App on your phone
****NB**** Requires Android - 5.0 and up
5. Once the RV MEDIA App is installed, open the App
6. The speaker should be turned on and in ‘pairing mode’ (Both Blue and Red lights will be pulsing intermittently)
7. You will then see the RV Media RGB speaker and tap that to pair with your phone

8. You must hit the 'allow location button' as it is part of the Google protocols for this speaker
9. Once you have 'allowed the location' to be accessed, you will then be presented with the following menu to enable you to control the lighting of your speaker

10. You can choose your own lighting colour from the LED Light Colour menu, change the output sound of the speaker from the 'Speaker mode' menu and you can set the timer to automatically turn off the speaker at the desired time via the countdown timer in the 'Set Timer' menu. If using the Set Timer function, simply choose how long you would like the speaker to remain active and then hit the 'Apply' button at the bottom of the screen.

Please note, as this function completely powers off the speaker, you will not be able to turn it back on via the App. To power the speaker up again, you will need to turn it off and on at the main power switch.

11. To enable streaming of music from your phone, go in to your 'Settings' App, ensure Bluetooth is turned on, and locate the RV Media RGB device. Tap this device to pair with your phone.
12. Open your music from your phone and it will play on the RV Media RGB speaker
13. All volume is controlled via the phone

8. You can choose your own lighting colour from the LED Light Colour menu and adjust the brightness of the light by rotating the circle around the colour spectrum
9. By selecting the bottom left button from the screen, you can change the sound output of your music.
10. The light bulb enables you to remotely turn the speaker light 'off' or 'on'
11. The bottom right button presents the following options;

12. Colour Scan gives you the option to have the light rotate continuously through all colours. You are also able to choose how 'fast' or 'slow' you would like the colours to change
13. Insect Light changes the colour to yellow to 'ward' off insect

14. Sleep timer gives you the option to have the speaker turn off at the designated time

Please note, this function completely powers off the speaker, you will not be able to turn it back on via the App. To power the speaker up again, you will need to turn it off and on at its main power switch

15. To enable streaming of music from your phone, go in to your "settings", ensure Bluetooth is turned on, and locate the RV Media RGB device. Tap this device to pair with your phone
16. Open your music to play from your phone and it will now be heard from the RV Media RGB speaker
17. All volume is controlled via the phone
