## Camec Asymmetric Sway Control System

The new Camec Sway Control System makes towing safer and easier by sensing trailer sway as soon as it begins.

The system monitors the angle of the trailer to the towing vehicle up to 400 times per second and applies the brakes on the wheels on the side of the trailer that is moving out of line - providing torque to arrest sway immediately.

- Easy to install by an authorized installer
- Works off the trailer's battery - any suitable tow vehicle can be used (unlike some brands)
- Does not require pre-programming (unlike some brands)
- Senses sway up to 400 times per second
- Providing early intervention
